Tower Sizing Information

When ordering your tower, you might need to provide two width measurements on your boat. The **Front Width Measurement** will be the distance between where the two front legs will connect to your boat. The **Rear Width Measurement** will be the distance between where the two rear legs will connect to your boat. Depending on the tower the width varies from front to rear. Please note that the tower can be installed anywhere along the boat's hull where there is under the gunnel access to install the backing hardware.

Notes About Big Air Towers

Reinforcement

All Big Air Towers require a hull width of at least 3/8" thickness. Hulls under 3/8" thick will need to be reinforced. Recommended reinforcement materials are aluminum, stainless steel, marine grade plywood, or a fiber glass kit. Reinforce the hull until the hull thickness is 3/8" or greater. The optimum area to reinforce is roughly 4" by 8" but we understand that some boat models offer limited space, so just do the best you can with what you've got. If aluminum, stainless, or marine plywood is used, we do recommend a little epoxy or some other sealant between the hull and the reinforcement material and then use the gasket and backer plate that we provide. Please notify Big Air with any questions or concerns.

Pre-Existing Biminis

Most factory and after market bimini tops can fit under our towers. The H2O and Plasma Towers can be built to fit around them, but we would need four measurements from the boat and the bimini:

- Width of the boat where the front legs of the tower will attach.
- Width of the boat where the rear legs of the tower will attach.
- Height of the bimini from the tower mount locations.
- Width of bimini at the top.

Warranty

For a copy of the warranty, please view the final page of this catalog.

Towers

Wave Tower

The Big Air Wave Tower offers truly unique styling that is sure to catch the eye of anyone on the lake. Constructed from 6061 T6 aircraft grade aluminum tubing, the Wave Tower is a reverse arch tower with tons of style appeal and fine tuned stability features.

The Wave Tower comes in a polished aluminum, or black powder coat finish.

The Wave Tower can accommodate boat widths from 70" to 103" wide, for a truly universal design that will fit almost any boat on the market. The Wave Tower is easily collapsed to a height of 28 inches.

The Wave Tower features integrated wakeboard racks and is built from 2.25" diameter high quality aluminum tubing with stability ridges on the inside of the main arch. The tower has a 38 inch front to back stance.

Tower comes with a 5 year limited warranty.

From its mounts, the tower normally stands around 58". It is great for wakeboarding, kneeboarding, skiing of all types, hydrofoil, and air chair but ABSOLUTELY NO INFLATABLES.

For more information, please visit <http://www.bigairwaketowers.com/towers/wave/>.

Cuda Tower

The Cuda Tower is a brand new radical forward swept design that is fresh out of the Big Air Development lab. It has crazy sexy swooping styling, thick and rigid tubing, ultra polished finish, and universal mounts. Constructed from 6061 T6 aircraft grade aluminum tubing, the Cuda Tower has a forward sweeping design that is incredibly rigid for a stable pull behind the boat and makes your boat look better than anything else on water.

The swept forward styling gives the look of a modern progressive wakeboarding boat. The Cuda Tower can accommodate boat widths from 70" to 100" wide, for a truly universal design that will fit almost any boat on the market. The Cuda Tower allows one person to quickly and easily fold this tower

The Cuda Tower comes in a polished aluminum, or black powder coat finish.

The Cuda Tower is built from 2.25" diameter high quality aluminum tubing with stability ridges on the inside of the top corners and the front legs. The tower has a 39 inch non-adjustable front to back stance.

Tower comes with a 5 year limited warranty.

From its mounts, the tower normally stands around 64". It is great for wakeboarding, kneeboarding, skiing of all types, hydrofoil, and air chair but ABSOLUTELY NO INFLATABLES.

For more information, please visit <http://www.bigairwaketowers.com/towers/cuda/>.

H2O Tower

The H2O Wakeboard Tower is a combination of stainless steel and aircraft grade aluminum that is built custom to the measurements we receive from customers' boats (see Tower Sizing Information below.)

The H2O tower comes in a Brushed Metal finish, a Black Powder Coat finish, and a White Powder Coat finish. Custom color powder coats are available but will add three weeks to the tower's lead time. The Brushed Metal finish comes as a satin-gloss look, but a customer can take this to a chrome-like shine with a buffing wheel or a fine grade of steel wool.

The tower collapses to a height of between 24" and 28" by releasing the front quick release knobs, laying the tower back, and removing the front legs of the tower (via some detent pins.)

The tower can be designed to fit around most factory bimini tops. To find out if the tower can be made to fit around a specific top, measure the width of the boat's hull where you plan to mount the front legs of the tower, the width of the hull where you plan to mount the rear legs of the tower, the height of your bimini from the point you plan to mount the tower legs, and the width of the bimini at the top. With those four measurements we can determine if we can accommodate the bimini or if there will be a bind issue.

Tower comes with a 5 year limited warranty.

From its mounts, the tower stands 60". It is great for wakeboarding, kneeboarding, skiing of all types, hydrofoil, and air chair but ABSOLUTELY NO INFLATABLES.

For more information, please visit <http://www.bigairwaketowers.com/towers/h2o/>.

Plasma Tower

The Plasma Tower is a reverse arch combination of stainless steel and aircraft grade aluminum that is built custom to the measurements we receive from customers' boats (see Tower Sizing Information below.)

The Plasma Tower comes in a Brushed Metal finish, a Black Powder Coat finish, and a White Powder Coat finish. Custom color powder coats are available but will add three weeks to the tower's lead time. The Brushed Metal finish comes as a satin-gloss look, but a customer can take this to a chrome-like shine with a buffing wheel or a fine grade of steel wool.

The tower collapses to a height of between 24" and 28" by releasing the rear quick release knobs, laying the tower forward, and removing the rear legs of the tower (via some detent pins.)

The tower can be designed to fit around most factory bimini tops. To find out if the tower can be made to fit around a specific top, measure the width of the boat's hull where you plan to mount the front legs of the tower, the width of the hull where you plan to mount the rear legs of the tower, the height of your bimini from the point you plan to mount the tower legs, and the width of the bimini at the top. With those four measurements we can determine if we can accommodate the bimini or if there will be a bind issue.

Tower comes with a 5 year limited warranty.

From its mounts, the tower stands 60". It is great for wakeboarding, kneeboarding, skiing of all types, hydrofoil, and air chair but ABSOLUTELY NO INFLATABLES.

For more information, please visit <http://www.bigairwaketowers.com/towers/plasma/>.

Vapor Tower

The Big Air Vapor Tower has a swooped styling, thick and rigid tubing, ultra polished finish, and universal mounts. Constructed from 6061 T6 aircraft grade aluminum tubing, the Vapor Tower has a swept back design that is incredibly rigid for a stable pull behind the boat.

The Vapor Tower can accommodate boat widths between 72" and 108" wide, for a truly universal design that will fit almost any boat on the market. The Vapor Tower allows one person to quickly and easily fold this tower below windshield height for convenient storage in a standard garage.

The Vapor Tower comes in a polished aluminum, or black powder coat finish.

The Vapor Tower features 2.25" diameter high quality aluminum tubing that results in a strong tower that is lightweight. The tower has a 72 inch non adjustable front to back stance.

From its mounts, the tower normally stands around 55". It is great for wakeboarding, kneeboarding, skiing of all types, hydrofoil, and air chair but **ABSOLUTELY NO INFLATABLES**.

Tower comes with a 5 year limited warranty.

For more information, please visit <http://www.bigairwaketowers.com/towers/vapor/>.

Storm Tower

The Storm Tower is a universal aluminum tower that will adjust to fit any boat between 68” and 98”. It will fit almost any boat that is longer than 16 feet, has mounting locations within the required range and access under the gunnel at the mounting locations.

The Storm Tower has a swooped styling, thick and rigid tubing, ultra polished finish, and universal mounts. It is constructed from 2.25” outer diameter 6061 T6 aircraft grade aluminum tubing. The Storm Tower allows one person to quickly and easily fold this tower below windshield height for convenient storage in a standard garage.

The Storm Tower comes in a polished aluminum, or black powder coat finish.

Tower comes with a 5 year limited warranty.

From its mounts, the tower normally stands around 55”. It is great for wakeboarding, kneeboarding, skiing of all types, hydrofoil, and air chair but **ABSOLUTELY NO INFLATABLES**.

For more information, please visit <http://www.bigairwaketowers.com/towers/storm/>.

Ice Tower

The Ice Tower is a universal aluminum tower that will adjust to fit any boat between 62” and 98”. It will fit almost any boat that is longer than 16 feet, has mounting locations within the required range and access under the gunnel at the mounting locations.

The Ice Tower has a swooped styling, thick and rigid tubing, ultra polished finish, and universal mounts. It is constructed from 2.25” outer diameter 6061 T6 aircraft grade aluminum tubing. The Ice Tower allows one person to quickly and easily fold this tower below windshield height for convenient storage in a standard garage.

The Ice Tower comes in a polished aluminum, or black powder coat finish.

Tower comes with a 5 year limited warranty.

From its mounts, the tower normally stands around 55”. It is great for wakeboarding, kneeboarding, skiing of all types, hydrofoil, and air chair but **ABSOLUTELY NO INFLATABLES**.

For more information, please visit <http://www.bigairwaketowers.com/towers/ice/>.

BIMINIS

Big Air Custom Bimini

Big Air Biminis are a perfect fit on our wakeboard towers, but our biminis will also fit most brands of wakeboard towers. Easy installation requires no drilling. We use Glen Raven Sunbrella™ canvas that is guaranteed for 5 years against fading. The biminis come in a range of 18 colors with custom colors available for an extra fee. Tops can come either in one solid color or with an accent stripe for an additional fee. All Big Air biminis come with a color coordinated Sunbrella protective boot for transport.

Please note that the measurements for the Bimini must come from an installed tower. We cannot make a Bimini before the tower has been fully installed, even if we made the tower. Also note that while other items can be returned if unsatisfactory, because of the nature of Bimini manufacturing, Bimini tops cannot be returned or refunded.

For more information, please visit <http://www.bigairwaketowers.com/bimini/>.

Single Standard Color Bimini (choose from colors Jet Black, Natural, Forest Green, Pacific Blue, Jockey Red, Cadet Grey, Burgundy or Toast)

Single Premium Color Bimini (choose from colors Persian Green, Turquoise, Sky Blue, Royal Blue, Navy, Concord, Logo Red, Charcoal Grey, Orange, or Sunflower.Yellow)

Two Color Bimini (3 stripes total: for example Jet Black / Natural / Jet Black)

Three Color Bimini (5 stripes total: Jet Black / Natural / Logo Red / Natural / Jet Black)

Custom Sunbrella colors (colors not mentioned above) will be an extra \$40 per color.

Big Air Super Shadow

The Big Air Super Shadow is a universal bimini designed to fit most wakeboard towers.

The Super Shadow is a standard 76" square.

The top is made of Glen Raven Sunbrella™ canvas which is guaranteed for 5 years.

Basic Jet Black - solid

Single Standard Color Bimini (choose from colors Jet Black, Natural, Forest Green, Pacific Blue, Jockey Red, Cadet Grey, Burgundy or Toast)

Single Premium Color Bimini (choose from colors Persian Green, Turquoise, Sky Blue, Royal Blue, Navy, Concord, Logo Red, Charcoal Grey, Orange, or Sunflower. Yellow)

Two Color Bimini (3 stripes total: for example Jet Black / Natural / Jet Black)

Three Color Bimini (5 stripes total: Jet Black / Natural / Logo Red / Natural / Jet Black)

PC II Universal Pylon

Our Universal Pylon is constructed of pylons are made of aircraft grade 6061-T6 aluminum. Its unique cable set up allows maximum stability without sacrificing rear seating.

Pylons stand seven feet from the deck of the boat. All parts of the pylon come with a one year parts and labor warranty. It is great for wakeboarding, kneeboarding, skiing of all types, hydrofoil, and air chair but ABSOLUTELY NO INFLATABLES.

For more information, please visit <http://www.bigairwaketowers.com/pylons/>.

Pro-Comp Slip-On Pylon

Our Slip On Pylon works with factory pylons with a 2.5" outer diameter.

The Slip On Pylon brings the tow point up to a seven foot height. All parts of the pylon come with a one year parts and labor warranty. It is great for wakeboarding, kneeboarding, skiing of all types, hydrofoil, and air chair but **ABSOLUTELY NO INFLATABLES**.

For more information, please visit <http://www.bigairwaketowers.com/pylons/>.

Wakeboard Racks

Big Air Plasma Rack

Versatile mounting clamp can adjust to fit horizontal or vertical pipe. Holds two wake boards. Made with UV resistant bungee cable. Comes with rubber linings in forks to protect your boards. Clamps come with inserts that fit pipe diameters of 2", 2.25", and 2.5". Polished or black finish.

Big Air Combo Rack

Versatile mounting clamp can adjust to fit horizontal or vertical pipe. Holds one wakeboard and one kneeboard. Made with UV resistant bungee cable. Comes with rubber linings in forks to protect your boards. Clamps come with inserts that fit pipe diameters of 2", 2.25", and 2.5". Polished or black finish.

Big Air Ski Rack

Versatile mounting clamp can adjust to fit horizontal or vertical pipe. Holds two skis. Made with UV resistant bungee cable. Comes with rubber linings in forks to protect your boards. Clamps come with inserts that fit pipe diameters of 2", 2.25", and 2.5". Polished finish only.

NEW Big Air Razor Wake Rack

Newly designed clamping system with 360 degree adjustability. Clamp can adjust to fit horizontal or vertical pipe. Holds two wake boards. Made with UV resistant bungee cable. Comes with rubber linings in forks to protect your boards. Clamps come with inserts that fit pipe diameters of 2", 2.25", and 2.5". Polished finish only.

NEW Big Air Razor Combo Rack

Newly designed clamping system with 360 degree adjustability. Clamp can adjust to fit horizontal or vertical pipe. Holds one kneeboard and one wakeboard. Made with UV resistant bungee cable. Comes with rubber linings in forks to protect your boards. Clamps come with inserts that fit pipe diameters of 2", 2.25", and 2.5". Polished finish only.

NEW Big Air Razor Ski Rack

Newly designed clamping system with 360 degree adjustability. Clamp can adjust to fit horizontal or vertical pipe. Holds 2 skis. Made with UV resistant bungee cable. Comes with rubber linings in forks to protect your boards. Clamps come with inserts that fit pipe diameters of 2", 2.25", and 2.5". Polished finish only.

Big Air Cross Rack

Elegance, simplicity, affordability. Holds two wake boards. Made with UV resistant bungee cable. Comes with rubber linings in the forks to protect your boards. Comes is 2" or 2.25" clamps.

Shipping \$15 (shipping waived when combined with tower order)

Big Air Combo Cross Rack

Elegance, simplicity, affordability. Holds one kneeboard and one wake board. Made with UV resistant bungee cable. Comes with rubber linings in the forks to protect your boards. Comes is 2" or 2.25" clamps.

Shipping \$15 (shipping waived when combined with tower order)

Other Big Air Accessories

Big Air Oasis Rack (Towerless)

For boats without a wakeboard tower.
Holds two wake boards.
Made with UV resistant bungee cable.
Comes with rubber linings in forks to protect your boards.

Big Air Mirror

Fully adjustable hinged arm.
Mounts to the front driver's side leg of any wakeboard tower with a 2", 2.25", or 2.5" outer pipe diameter.
Convex mirror. Reflective area is 12" x 6".

Big Air Light Bar

Stylish and affordable, our Big Air Light Bar features five 12 volt 55 watt lights to light up the lake after sunset. Polished aluminum harness allows the wires to be run inside and out of sight. Clamps come with inserts that fit pipe diameters of 2", 2.25", 2.375", and 2.5".

Big Air Speaker Light Bar Combo

High quality, stylish, and just what you need. Our Big Air Speaker Light Bar Combo features 4 12 volt 55 watt lights and 4 Kicker marine grade 6130 speakers. 4 Ohms with 195 Watt Peak Power each speaker.

**Available to upgrade to LED speakers.

For more information, please visit: <http://www.bigairwaketowers.com/accessories/>

Speakers

Big Air Bullet Speakers

4 Ohms with 195 Watt Peak Power
Polished aluminum casing
Mounts to fit 2" to 2.5"
Marine Grade Kicker 6130 Speakers
Available in polished or black finish

** Available to upgrade to LED speakers

Big Air Dual Bullet Speakers

4 speakers, 2 speakers per clamp
4 Ohms with 195 Watt Peak Power
Polished aluminum casing
Mounts to fit 2" to 2.5"
Marine Grade Kicker 6130 Speakers
Available in polished or black finish

** Available to upgrade to LED speakers

Kicker Dual Can Speakers

High quality two way speaker systems specifically designed marine environments. Dual 6.5" mid-range drivers flanking a unique exponential-horn-loaded titanium-dome tweeter intensify and carry the music from any aquatic cruiser.

Tower Warranty

Terms and Conditions of Use for Big Air wake towers

Big Air towers come with a five year limited warranty on material and workmanship. Any warranty issues should be addressed by calling 580-252-5314.

Always use common sense boat and water safety procedures while enjoying your Big Air tower.

Tow ropes should be attached only to the tow knob.

Tower must be installed on a hull that is at least 3/8" thick or greater or on a hull that has been reinforced to 3/8" or greater.

NEVER tow or be towed by other types of watercraft using the tower, regardless of the size of the other craft.

NEVER pull a tube or any inflatable from your tower.

NEVER use the tower while under the influence of drugs or alcohol.

DO NOT attempt to modify the tower in any way.

Improper installation, direct, indirect or consequential accidents, abuse, neglect, and normal wear and tear are not covered by warranty.

Big Air Pylons Inc. is in no way responsible for any damage or harm caused from improper use or installation.

Big Air Pylons Inc. makes no other warranties of any kind, express or implied.

Limitations of Liability

Big Air Pylons Inc DBA Big Air Waketowers, guarantees the integrity and feasibility of our products and their components.

Any defect or mechanical failure occurring in one of the parts provided should be reported to Big Air Pylons for replacement or repair.

Any damage that occurs as a result of an installation that does not follow the installation procedures provided with the product is the responsibility and liability of the installer.

Our products are not guaranteed to work with or allow normal function of other products (i.e. biminis, pylons, booms, etc.) and it is the responsibility of the customer or the customers representative (i.e. Dealer) to inquire about any possible issues.
